

ARE YOUR ADDRESS NUMBERS POSTED?

IF YOU DIAL 911, CAN WE FIND YOU?

**If your address is properly displayed
on your business, we can!**

During an emergency, time is critical. It is very important that you post your address numbers correctly so that emergency responders can find you quickly, day or night!

The Ohio Fire Code & the Southwest Ohio Fire Safety Council (SWOFSC) Unified Standards require the following relative to business addresses in Anderson Township:

Address identification numbers must be in a position that is plainly legible and visible from the street or road fronting the property.

This is the easiest way for responders to identify the proper address of the structure.

Numbers shall be in standard Arabic form of a size at least five (5) inches tall by three (3) inches wide or larger if necessary to be visible from the nearest fronting road.

Script writing, italics and other forms of numbers are decorative but can be very difficult to read accurately in a hurry.

Address numbers shall contrast with their background.

Glass and other backgrounds make it difficult for first responders to quickly identify a posted address.
