

COVID-19 Checklist for Businesses/Employers

Top 10 Things You Can Do to Prepare for COVID-19

Ohio Department of Health Director Amy Acton, M.D., MPH, strongly recommends that all businesses/employers immediately take the following actions:

- Actively encourage sick employees to stay home until they are free of fever or symptoms (without the use of medication) for at least 24 hours. Do not require a healthcare provider's note to validate the illness or return to work of employees sick with acute respiratory illness; healthcare provider offices and medical facilities may be extremely busy and not able to provide such documentation in a timely way.
- Ensure that your sick leave policies are up to date, flexible, and non-punitive to allow sick employees to stay home to care for themselves, children, or other family members. Consider encouraging employees to do a self-assessment each day to check if they have any COVID-19 symptoms (fever, cough, shortness of breath, etc.).
- Separate employees who appear to have acute respiratory illness symptoms from other employees and send them home immediately. Restrict their access to the business until they have recovered.
- Reinforce key messages — [stay home when sick](#), use [cough and sneeze etiquette](#), and practice [hand hygiene](#) — to all employees, place posters in areas where they are most likely to be seen. Provide protection supplies such as soap and water, hand sanitizer, tissues, and no-touch disposal receptacles for use by employees.
- Frequently perform enhanced environmental cleaning of commonly touched surfaces, such as workstations, countertops, railings, door handles, and doorknobs. Use the cleaning agents that are usually used in these areas and follow the directions on the label. Provide disposable wipes so that commonly used surfaces can be wiped down by employees before each use.

- ✓ Be prepared to change business practices if needed to maintain critical operations (e.g., identify alternative suppliers, prioritize customers, or temporarily suspend some of your operations).
- ✓ Implement policies such as telework and staggered shifts to enhance distance between employees.
- ✓ Consider canceling non-essential business travel to other countries per [CDC's travel guidance](#).
- ✓ Remove candy dishes and limit the sharing of pens and workplace equipment.
